Head of Product Design

Product Management · Design Leadership · AI-Native Product Development

---

01
PROFILE

Product design and product management leader with 15+ years across fintech, enterprise B2B, and consumer platforms, from founding and running a B2B product company to leading design for a national e-wallet.

Pairs hands-on AI practice (agentic orchestration, Claude Code, and AI-native delivery) with the operating discipline that makes it stick inside organizations: design systems, sprint and PRD standards, and regulated-fintech compliance. Consistently ties design work to measurable business outcomes.

15+	70M+	80%	8 yrs
Years in digital product	Users on LinkAja's consumer app	Customer-service OPEX reduction	Founder & director, B2B product company

02
EXPERIENCE

Independent Consulting

Product & AI Design Consultant — NOV 2025 – PRESENT

- **Enterprise AI:** built a data-to-decision workflow that validates and cleans siloed legacy data, then puts live, AI-driven decisions in front of the people running the business, targeting the data-readiness gap where most enterprise AI pilots stall.
- **Agentic orchestration:** design and run multi-agent Claude Code builds with specialist sub-agents for brand, design exploration, prototyping, and shipping to take products from concept to working software.
- **Advisory & mentorship:** advise businesses on AI-augmented UX strategy and design systems, and coach designers on bringing AI tooling into their day-to-day workflow.

Komunal Indonesia

Senior Manager, Product Design & PM Oversight — JUN 2024 – NOV 2025

Regulated fintech. Owned end-to-end product design strategy for the DepositoBPR app across revenue, engagement, and operational reliability.

- **Design-to-web velocity:** introduced Framer to replace a developer-dependent Sanity workflow, cutting design-to-web delivery from weeks to days; it now runs product landing pages and the company site.
- **Audit to revamp:** ran a full product design audit (UI, UX, IA, accessibility, interaction patterns) and turned the findings into a multi-phase UX revamp that improved funnel completion and engagement.
- **Design system:** initiated Komunal's design system: shared components, color and type standards, and asset libraries used by Product, Tech, Marketing, and external teams.
- **Delivery operating model:** rolled out a sprint workflow across Product, Marketing, Tech, and Design with defined phases, checkpoints, and standardized PRD and backlog templates, raising predictability and accountability.
- **Regulatory delivery:** oversaw ISO and OJK (Indonesia Financial Services Authority) compliance workflows without slowing UX delivery.

LinkAja

Product Design Lead SEP 2021 – JUN 2023

Indonesian e-wallet. Led consumer app design for 70M+ users.

- **Cost reduction:** cut customer-service OPEX by up to 80% by designing self-service flows that resolved issues without an agent.
- **Home revamp:** co-led the home screen redesign, improving information architecture, clarity, and engagement metrics.
- **Feature delivery:** designed and shipped MyPaylater, a chatbot revamp, and loyalty improvements.
- **Team operations:** introduced workflow and SOP updates that reduced delivery friction and raised team efficiency.
- **Recognition:** Customer Champion Award, for keeping new technology and features from distracting users from the product's core purpose.

Dash Inovasi Abadi

Founder & Director NOV 2016 – OCT 2024

Commissioner (board), Jan 2021 – Present

- **Company building:** founded and led a B2B product company serving SME and enterprise clients, including leading Indonesian F&B and retail brands, with cloud-based ordering, POS terminals, and a customer-loyalty platform.
- **Governance:** as commissioner, set long-term strategy and oversee governance, financial health, and risk; primary representative to investors and shareholders.

Lumio Inovasi Technology

VP of Design NOV 2016 – OCT 2024

Commissioner (board), Jan 2021 – Present

- **Platform design:** led design for a cloud platform that gives digital-signage owners business metrics on their display networks and maximizes content-slot revenue, including on older, existing screens.

Appsindo Technology

Lead UI/UX Designer JUL 2011 – SEP 2016

- **Project leadership:** led UI/UX from initial concept to delivery as project lead and supervisor, managing creative assets and the quality of final products.

03 SKILLS & KNOWLEDGE

LEADERSHIP	Product Strategy & Discovery · Product Management Oversight · Delivery Operating Models (Agile/Scrum, PRD standards) · Stakeholder Management · Corporate Governance · Business Development · Mentoring
AI & EMERGING TECH	Agentic Orchestration · Agentic Workflows & Automation · AI-Native SDLC · AI Feature Strategy · AI-Assisted Prototyping · Prompt Engineering · Model Context Protocol (MCP)
DESIGN	Design Systems · UX Strategy & Audits · Information Architecture · User Research · Prototyping · Accessibility (A11Y) · UI/UX Design
TOOLS	Claude Code · Figma · Framer · Sketch · Adobe Creative Suite

04 EDUCATION & CERTIFICATIONS

The AI-Native SDLC Playbook 2026
